From the answer to each across clue one letter must be omitted wherever it occurs (often more than once) before entry in the diagram. To the answer to each down clue one letter must be added, at any point but not unchecked, before entry in the diagram. Definitions in both across and down clues refer to untreated answers; cryptic indications refer in both to the answers as they appear in the diagram. Numbers in brackets show the length of untreated answers, both across and down. The letters omitted from the acrosses followed by the letters added to the downs, read in clue order, form a vaguely appropriate quotation in recent editions of the Oxford Dictionary of Quotations.
